EDUCATION

Loyola Marymount University

Masters of Science in Business Analytics
• Beta Gamma Sigma Honor Society

Aug 2025 – Aug 2026
(In Progress) Los Angeles, CA

Gonzaga University

Bachelor of Arts in Economics; Minor in Management Information Systems
• Deans List Spring 2023, Presidents List Spring 2024 | Business Analytics Science Certificate

Aug 2021 – May 2025
Spokane, WA

SKILLS

- **Analytics & Programming:** Python (pandas, NumPy, scikit-learn), SQL, R, Excel — with applied experience in regression, classification, clustering, and EDA
- **Business Intelligence & Visualization:** Tableau, Dashboard Development, KPI Tracking, Data Storytelling, Executive Reporting, Cross-Functional Communication
- **Data Management & Engineering:** ETL Pipeline Development, Data Cleaning & Normalization, Multi-Source Data Integration, Large-Scale Processing (Spark), Data Integrity & Validation
- **Modeling & Statistical Analysis:** Regression Analysis, Predictive Modeling, Neural Networks, NLP, Feature Engineering, Model Evaluation (AUC, Precision/Recall), Hypothesis Testing
- **Tools & Platforms:** Jupyter Notebook, MySQL Workbench, DBeaver, GitHub, Microsoft 365

EXPERIENCE

Guardian Insight Group

Data Analytics Intern

May 2025 – August 2025

- Designed donor-candidate matching logic from scratch, applying correlation analysis across demographic, behavioral, and giving history variables to identify high-propensity prospects from a 435K+ record dataset
- Translated client questionnaire inputs into analytical scoring criteria, delivering ranked prospect lists as structured CSV outputs to support targeted outreach decisions
- Built ETL pipelines to clean and normalize donor data, ensuring reliable and repeatable delivery of client-facing analytical outputs

Emily Shane Foundation

Data Visualization & Analytics Specialist

December 2025 – Present | Los Angeles, CA

- Cleaned and standardized academic performance and Likert-scale survey data across 10 program sites, resolving inconsistencies in qualitative responses and structuring raw inputs into analysis-ready datasets
- Analyzed grade improvement trends and student attitudinal data — including survey responses on school enjoyment, college aspirations, and academic motivation — across 10 sites to identify patterns in program effectiveness and surface actionable insights for leadership
- Translated analytical findings into multiple deliverable formats — dashboards, website content, newsletter visuals, brochure graphics, and a founder presentation — used to support government funding applications and communicate program impact to external stakeholders

Loyola Marymount University – Office of the Registrar

Registrar Assistant

Aug 2025 – Present | Los Angeles, CA

- Maintained student record accuracy across Workday, Banner, and Degree Audit systems in compliance with FERPA standards
- Identified and resolved cross-system data discrepancies by tracing entry errors and validating record integrity under strict deadlines

PROJECTS

Pediatric Medication Analysis | Python

Fall 2024

- Cleaned and analyzed Poison Control Center data on pediatric therapeutic errors involving ibuprofen and acetaminophen, standardizing 1,500+ records across two datasets with inconsistent entry formats and missing values to build an analysis-ready dataset.
- Identified demand pattern shifts in pediatric medication error cases across pre- and during-tripledemic periods (COVID-19, flu, RSV), producing before/after comparison charts and summary tables that surfaced actionable insights on dosage error trends by age group.
- Delivered findings as a structured analytical report translating statistical outputs into clear, evidence-based conclusions relevant to public health resource planning.

Yelp Review NLP & Business Insights Analysis | Spark & BERTopic

Fall 2025

- Built distributed Spark pipelines to process 3M+ Yelp reviews and applied BERTopic to extract cuisine- and aspect-level themes related to service quality and customer experience at scale.
- Linked topic prevalence and sentiment patterns to rating deviations and review volume, translating unstructured text into specific business recommendations around operational improvements and customer satisfaction drivers.

Free Community College Policy Impact Analysis | Regression Analysis & Rstudio

Fall 2025

- Conducted multivariate regression on state-level enrollment and poverty data, testing multiple model specifications to evaluate the relationship between free community college access and economic outcomes.
- Authored a full academic paper interpreting coefficient effects within a policy context, translating statistical findings into evidence-based insights for education funding decisions.
